Question ID : 264330173922
Option 1 ID : 264330682146
Option 2 ID : 264330682145
Option 3 ID : 264330682143
Option 4 ID : 264330682144
Status : Answered
Chosen Option : 3

Q.9 Which of these animals can stay both inside the pond water as well as move on land?

- Ans 1. Bat
 2. Fish
 3. Elephant
 4. Frog

Question ID : 264330193173
Option 1 ID : 264330755804
Option 2 ID : 264330755802
Option 3 ID : 264330755805
Option 4 ID : 264330755803
Status : Marked For Review
Chosen Option : 4

Q.10 In which year was the first Census of India conducted?

- Ans 1. 1941
 2. 1901
 3. 1872
 4. 1951

Question ID : 264330179545
Option 1 ID : 264330704179
Option 2 ID : 264330704182
Option 3 ID : 264330704181
Option 4 ID : 264330704180
Status : Answered
Chosen Option : 3

Q.11 In which of the following is each carbon atom bonded to three other carbon atoms in the same plane giving a hexagonal array?

- Ans 1. Methane
 2. Diamond
 3. Ethane
 4. Graphite

Question ID : 264330179725
Option 1 ID : 264330704893
Option 2 ID : 264330704892
Option 3 ID : 264330704894
Option 4 ID : 264330704891
Status : Answered
Chosen Option : 2

Q.12 The degree of convergence or divergence of light rays achieved by a lens is expressed in terms of its_____.

- Ans
- 1. Momentum
 - 2. Speed
 - 3. Power
 - 4. Energy

Question ID : 264330193186
Option 1 ID : 264330755857
Option 2 ID : 264330755855
Option 3 ID : 264330755856
Option 4 ID : 264330755854
Status : Answered
Chosen Option : 1

- 1. Only A and D
 - 2. Only A and C
 - 3. Only B
 - 4. Only C and D

Question ID : 264330193182
Option 1 ID : 264330755839
Option 2 ID : 264330755841
Option 3 ID : 264330755838
Option 4 ID : 264330755840
Status : Answered
Chosen Option : 2

Q.14 Calcium oxide reacts vigorously with water to produce slaked lime (calcium hydroxide) releasing a large amount of heat is an example of _____.

- Ans
- 1. Combination reaction
 - 2. Decomposition reaction
 - 3. Recombination reaction
 - 4. Displacement reaction

Question ID : 264330193156
Option 1 ID : 264330755734
Option 2 ID : 264330755736
Option 3 ID : 264330755735
Option 4 ID : 264330755737
Status : Answered
Chosen Option : 2

Q.15 Arrange the following events of photosynthesis in order of their occurrence:
A. Conversion of light energy to chemical energy and splitting of water molecules into hydrogen and oxygen.
B. Reduction of carbon dioxide to carbohydrates.
C. Absorption of light energy by chlorophyll.

- Ans
- 1. B, A, C
 - 2. A, C, B
 - 3. A, B, C
 - 4. C, A, B

Question ID : 264330193164
Option 1 ID : 264330755767
Option 2 ID : 264330755768
Option 3 ID : 264330755766
Option 4 ID : 264330755769
Status : Answered
Chosen Option : 4

Q.16 Which of the following is NOT correctly matched?

- Ans
- 1. Equisetum – Homosporous
 - 2. Cycas – Dioecious
 - 3. Pinus – Dioecious
 - 4. Salvinia – Heterosporous

Question ID : 264330120913
Option 1 ID : 264330473869
Option 2 ID : 264330473870

In the following passage, some words have been deleted. Read the passage carefully and select the most appropriate option to fill in each blank.

There has been an increase in the number of animal 1)_____ that have either become extinct or near extinction. Bengal tiger, 2)_____, which once roamed the jungle in vast numbers, is down to only around 2300 in the wild and by the year 2025, their population is 3)_____ to be down to zero. What is alarming about the case of the Bengal tiger is that this 4)_____ will have been caused almost entirely by poachers who, according to some sources, are not interested in material gain 5)_____ in personal gratification.

SubQuestion No : 79

Q.79 Select the most appropriate option to fill in blank no. 4.

- Ans** 1. extinction
 2. extinct
 3. extinguish
 4. extension

Question ID : 264330175217

Option 1 ID : 264330687224

Option 2 ID : 264330687223

Option 3 ID : 264330687225

Option 4 ID : 264330687226

Comprehension:

Read the given passage and answer the question that follows.

Electric Vehicles (EVs) first appeared in the late 1800s when electricity was a popular choice for driving motor vehicles. This method offered a comfort and ease of operation that gasoline cars of that era couldn't match. Despite internal combustion engines becoming the standard for cars and trucks for roughly a century, electricity continued to power other types of vehicles like trains and small vehicles. The environmental implications of petroleum-based transport and the concern over depleting oil reserves reignited interest in electric transportation infrastructure in the late 20th and early 21st centuries. EVs stand apart from vehicles powered by fossil fuels, in that they can run on electricity produced from various sources, including fossil fuels, nuclear power and renewables like solar and wind, or a mix of these. Consequently, the carbon footprint and emissions of EVs differ based on the source and technology used for electricity generation. The generated electricity can be stored in the vehicle through a battery, a flywheel or supercapacitors. In contrast, vehicles with internal combustion engines generally rely on a single or few sources, typically non-renewable fossil fuels. A significant advantage of EVs is regenerative braking, a feature that recuperates kinetic energy usually lost as heat during friction braking and converts it back into electricity to recharge the onboard battery.

SubQuestion No : 86

Q.86 Based on the information provided in the passage, which of the following is NOT a benefit of advanced electric vehicles over vehicles with an internal combustion engine?

- Ans** 1. Regenerative braking
 2. Potential for lower emissions
 3. Discomfort and complexity of operations
 4. Versatility of fuel sources

In contrast, vehicles with internal combustion engines generally rely on a single or few sources, typically non-renewable fossil fuels. A significant advantage of EVs is regenerative braking, a feature that recuperates kinetic energy usually lost as heat during friction braking and converts it back into electricity to recharge the onboard battery.

SubQuestion No : 88

Q.88 How does regenerative braking in electric vehicles work?

- Ans**
- 1. It uses kinetic energy to slow down the vehicle without engaging the brakes.
 - 2. It recovers kinetic energy lost as heat during friction braking and converts it back into electricity.
 - 3. It charges the battery when the vehicle is parked.
 - 4. It reduces the vehicle's speed without using any energy.

Comprehension:

Read the given passage and answer the question that follows.

Food security was defined by The World Food Summit of 1996 as existing when "all people, at all times, have physical, social and economic access to sufficient, safe and nutritious food to meet dietary needs for a productive and healthy life." Since 1948, food security has been considered a basic human right. In 2011, as much as 16% of the population of the earth was still going hungry. The earth's population is expected to grow from approximately 7 billion today to 8.3 billion in 2030, and to 9.1 billion in 2050. This translates to increase in food demand of 50% and 70%, respectively. While the agricultural industry is technically capable of producing 70% more food in 40 years, there is no guarantee that 70% more food will be available for people to eat.

A large part of the issue is the availability of water, which is critical to food security. Both, crops and livestock require it, and agriculture also requires large quantities of water for both irrigation and some production processes. In fact, agricultural systems use more water than any other activity on the globe. As much as 70% of all freshwater used by humans is used in agricultural irrigation. Access to adequate food in many developing countries also depends on the availability of water.

SubQuestion No : 91

Q.91 Select the most appropriate synonym of the given word taken from the passage.

Access

- Ans** 1. Plenty
 2. Entry
 3. Attack
 4. Achievement

Comprehension:

Read the given passage and answer the question that follows.

Humpback whales are seasonal migrants found in all of the world's oceans. In the North Pacific, humpback whales winter in tropical regions over the shallow coastal shelves associated with the Hawaiian Islands, Baja California, central Mexico, the Ryukyu Islands, Bonin Islands and Mariana Islands. They summer in cold temperate regions, also over shallow coastal shelves, from Point Conception, California, north through Alaska, west through the Aleutians, and south to Honshu Island, Japan. Calving and probably breeding occur on the wintering grounds. Feeding is believed to occur primarily in the summering grounds.

In Alaska, humpback whales are known to inhabit Prince William Sound, the waters of the Alexander Archipelago and the waters adjacent to Kodiak Island and the Aleutians. Some whales may also overwinter in the northern summering areas.

The distribution, movements, abundance and habitat requirements of humpback whales are not well known. Based upon Japanese catch statistics, the pre-exploitation population of humpback whales in the North Pacific is estimated to have been approximately 15,000. Much of the exploitation of humpback whales occurred in the 20th century, especially during the early 1960's.

A small number of whaling stations established in southeast Alaska took humpbacks between 1907 and 1922. In 1966, the International Whaling Commission imposed a worldwide ban on the taking of humpback whales.

SubQuestion No : 96

Q.96 Choose an appropriate title for the passage.

- Ans**
- 1. Humpback Whales
 - 2. Wintering and Summering of Humpback Whales
 - 3. Underwater Life
 - 4. Whales

In Alaska, humpback whales are known to inhabit Prince William Sound, the waters of the Alexander Archipelago and the waters adjacent to Kodiak Island and the Aleutians. Some whales may also overwinter in the northern summering areas.

The distribution, movements, abundance and habitat requirements of humpback whales are not well known. Based upon Japanese catch statistics, the pre-exploitation population of humpback whales in the North Pacific is estimated to have been approximately 15,000. Much of the exploitation of humpback whales occurred in the 20th century, especially during the early 1960's.

A small number of whaling stations established in southeast Alaska took humpbacks between 1907 and 1922. In 1966, the International Whaling Commission imposed a worldwide ban on the taking of humpback whales.

SubQuestion No : 97

Q.97 Identify the meaning of the underlined word in the following sentence from the passage.

In Alaska, humpback whales are known to inhabit Prince William Sound.

- Ans**
- 1. To live in a place
 - 2. Have the habit of
 - 3. Surround
 - 4. Depopulate

Option 1 ID : 264330715416

Option 2 ID : 264330715415

Option 3 ID : 264330715417

Option 4 ID : 264330715418

Status : Answered

Chosen Option : 1

Comprehension:

Read the given passage and answer the question that follows.

Humpback whales are seasonal migrants found in all of the world's oceans. In the North Pacific, humpback whales winter in tropical regions over the shallow coastal shelves associated with the Hawaiian Islands, Baja California, central Mexico, the Ryukyu Islands, Bonin Islands and Mariana Islands. They summer in cold temperate regions, also over shallow coastal shelves, from Point Conception, California, north through Alaska, west through the Aleutians, and south to Honshu Island, Japan. Calving and probably breeding occur on the wintering grounds. Feeding is believed to occur primarily in the summering grounds.

In Alaska, humpback whales are known to inhabit Prince William Sound, the waters of the Alexander Archipelago and the waters adjacent to Kodiak Island and the Aleutians. Some whales may also overwinter in the northern summering areas.
